

New How-to Guide for patient engagement

A research article submitted on behalf of the working group members has been successfully published and is available [online](#). Additionally, another comprehensive guide for specific patient engagement activities is now ready for use.

How-to Guide on **Patient Engagement in Clinical Trial Protocol Design** has been co-created to provide guidance to stakeholders on the implementation of Patient Engagement in clinical trial protocol design. This guide has been developed through a systematic co-creation methodology with **35** experts from **26** organizations.

[Download the How-to Guide now](#) or forward it to the relevant teams in your organization.
